M Rizki Nofsyiami

rizki.nofsyiami@gmail.com | rizkinfs.com | linkedin.com | github.com

Summary

Worked on a wide range of projects, from building internal apps, dashboards to creating landing pages designed to boost user engagement. Most notably, played a key role in developing a platform where millions of users can easily explore and purchase courses.

Experience

Frontend Web Developer

Telkom Indonesia | October 2019 - March 2025

- Ensured code quality according to company standards by conducting code reviews, writing comprehensive unit tests, and implementing appropriate tooling to streamline the development process.
- Led a team of six frontend developers, providing mentorship, technical guidance, to ensure both individual growth and successful project delivery.
- Integrated a headless CMS seamlessly into the product's blogging site, enhancing content management capabilities and improving the time of content delivery.
- Developed & maintained an internal user interface library based on the product design system, ensuring consistent styling and functionality across projects while boosting development efficiency.
- Collaborated with the product and marketing teams to implement Google Analytics, driving data-informed decisions and helping optimize strategies to improve product performance.

Software Engineer (Fullstack)

Quantus Telematika Indonesia | March 2018 - June 2019

- Developed collaborative document and form creation using WebSocket, enhancing simultaneous user editing, enabling multiple users to edit documents simultaneously with instant updates, thereby improving team productivity and collaboration.
- Designed and implemented video and audio communication features using WebRTC, facilitating seamless peer-to-peer communication within the application.
- Collaborated with DevOps to establish CI/CD pipelines via GitLab CI, streamlining deployment processes.

Education

Telkom University | 2010 - 2015 | GPA 3.32 / 4
Diploma in Accounting Information System
